

Designed to Efficiently Manage Your Surface Land Acquisitions

Pandell Projects, Pandell's land acquisition software, has been modeled to effectively manage communication between Producers and Land Brokers. Manage all aspects of your projects including Surface Leases, Third Party Agreements, Notifications/Consultation, First Nations Consultation and more.

With an intuitive interface and streamlined processes, **Pandell Projects** is the premier solution for land professionals.

FEATURES	ADVANTAGES
Web-Based Technology	Access Pandell Projects from anywhere simply using a web browser. Live data, real-time updates and access to our in-house, experienced software support team.
Simplified Processes, Reporting, Document Generation & Forecasting	Replace your tracking spreadsheets and take advantage of automated features and redesigned, predefined reports that make sense for your business needs.
Surface Leases	Track landowners, occupants, dispositions, titles and compensation values for all of your surface leases.
Third Party Agreements	Ensure that all required agreements are obtained and important information is stored.
Notifications/Consultation	Designed around the requirements of the AER's (Alberta Energy Regulator) Directive 56 to confirm that project specific requirements are met.
First Nations Consultation	Track key milestones and processes required by the ACO (Aboriginal Consultation Office).
LandLine	Pandell LandRite integration removes the dual-entry of data and allows surface leases and third party agreements to be transferred into Pandell LandRite.
Web Services	Secure web services gives clients remote access to their data and allows for seamless integration with other applications.
Enhanced Security	Every client has a unique global ID to ensure confidentiality of records. Connections are SSL encrypted and data is backed up regularly. Fully managed certified network provides 24/7 monitoring and maximum uptime.
